

**BLUE VINYL AND BLACK  
HEAVY DUTY URETHANE  
COLD PACKS**

**Durable, flexible BodyMed® Cold Packs  
make cold therapy convenient.**

Cold therapy is a time-tested and effective tool for reducing pain, swelling and inflammation, treating injuries, and mitigating the discomfort of chronic conditions. New BodyMed flexible, reusable cold packs make it easy and convenient for therapeutic cold treatment to customers.

Their practicality, ease of use and affordability can also make these gel ice packs a popular retail item.

**Product Features**

- Durable, leak-free performance. Withstands hundreds of cycles of freezing and thawing without splitting, tearing or dripping.
- Maintains total flexibility even when frozen, delivering cold therapy along the entire contour of the affected area.
- Once taken from the freezer, a BodyMed cold pack provides up to 30 minutes of therapeutic cold.
- Simple, inexpensive and time-tested method to reduce pain, swelling and inflammation in muscles and joints.
- Superior alternative to ice bags, which need refilling and can leak or drip.
- Affordable quality; yet another excellent value from the BodyMed® brand.
- Latex-free; no risk of allergic skin reactions.
- 1-year warranty.
